EASY TO MOUNT

tear off the protective foil from the adhesive tape on the plate

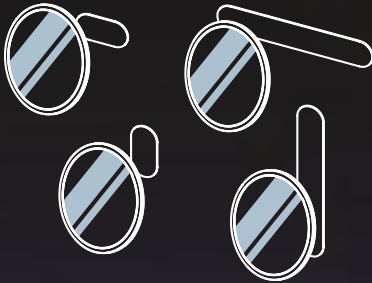

stick the plate to the surface (e.g. tiles, mirror etc.)

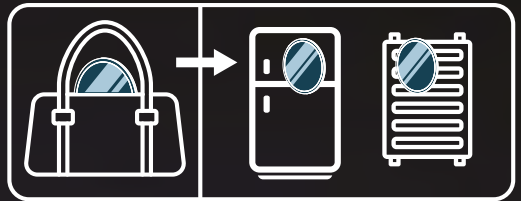

the built-in magnet means that you can attach or remove the mirror at any time

The plates can be attached to a smooth surface without the use of additional tools and in any chosen configuration: horizontally or vertically. The plates can be attached in 2 different rooms and the mirror can be moved wherever it will be used.

The mirror can be removed from the plate at any time and taken with you on a trip. It can then be attached to any other magnetic surface.

CHARGING

- the LED light can operate without connection to a power outlet, because it is charged via USB
- the built-in battery lasts 4-6 weeks (when used for about 10 minutes a day)

see the website!

holds thanks to adhesive forces and underpressure

reusable at any time

no tools required

- easy to attach without damaging the surface
- simple removal without leaving permanent traces

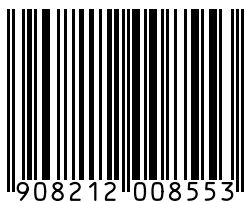

To prepare the surface for installing suction pads, we recommend using glass cleaner, vinegar, citric acid or dishwashing liquid. Make sure the contact surfaces are dry before attaching the suction pad. If the suction pad keeps coming off, the surface is not smooth enough.
